

Assignment 4 of CISC 3000

ZHANG HUA KANG

March 2, 2022

4.13

1

No, the authorization on v is only allows a user to be granted access to only part of relation r

0.1 2

Yes, if we want update data in view v , the data stored in the database will be update.

```
creat trigger    update_branch_cust_after_insert_account
after insert on  account
for each row
begin
    insert into   branch_cust    select
                                new.branch_name,    depositor.customer
                                from      depositor
                                where     new.account_number=depositor.account_number
end

creat trigger    update_branch_cust_after_insert_depositor
after insert on  depositor
for each row
begin
    insert into   branch_cust    select
                                new.customer_name, account.branch_name
                                from      account
                                where     new.account_number=account.account.number
end
```
